

AXIAL PISTON SWING MOTOR

PSM SERIES

PSM-29-01-R19

The PSM Series is an axial swash type piston motor which is used for swing of industrial machinery and industrial vehicles.

The mechanical brake relief valve and the make-up valve being built in, the swing movement of the motor is very smooth. The motor is made compact by arraying the motor, brake, and valve in a proper manner. High capacity and reliability have been realized by optimizing the design of the motor and the valves. Using the shockless valve has been minimized by absorbing changes in pressure and torque which may occur when the motor stops operation.

PSM系列是旋转斜盘式活塞马达，可用于建筑机械，工业车辆的旋回用途。

它配有机械制动安全阀和补偿阀，可平滑完成转动动作。通过合理布置马达、制动装置和阀门，重量更轻。优化的马达和阀门，实现高性能和高可靠性。吸收启动和停止时可能出现的压力波动扭矩波动，最大限度地减少了机械冲击。
